Search: The ACM Digital Library The Guide

Nothing Found

Your search for "**paul lebovitz**" OR "**mark lambert**" did not return any results.

You may want to try an [Advanced Search](#) for additional options.

Please review the [Quick Tips](#) below or for more information see the [Search Tips](#).

Quick Tips

- Enter your search terms in lower case with a space between the terms.

sales offices

You can also enter a full question or concept in plain language.

Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

"museum of natural history" "museum of modern art"

- Narrow your searches by using a **+** if a search term must appear on a page.

museum +art

- Exclude pages by using a **-** if a search term must not appear on a page.

museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

museum +"natural history" dinosaur -Chicago

1 Why TCP timers don't work well

 L Zhang

August 1986 **ACM SIGCOMM Computer Communication Review , Proceedings of the ACM SIGCOMM conference on Communications architectures & protocols SIGCOMM '86**, Volume 16 Issue 3

Publisher: ACM Press

Full text available:  [pdf\(909.63 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Repeated observation of TCP retransmission timer problems stimulated investigation into the roles and limitations of timers. Timers are indispensable tools in building up reliable distributed systems. However, as the experience with the TCP retransmission timer has shown, timers have intrinsic limitations in offering optimal performance. Any timeout based action is a guess based on incomplete information, and as such is bound to be non-optimal. We conclude that, if we aim at high performance ...

2 Computers and elections

 K. A. Frenkel

October 1988 **Communications of the ACM**, Volume 31 Issue 10

Publisher: ACM Press

Full text available:  [pdf\(1.48 MB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Along the twists and turns of this year's presidential campaign trails, computers act as strategic tools that exert a decisive impact on capturing voters' attention. But a National Bureau of Standards study claims that system implementations are dangerously inadequate at the finish line, where carefully gleaned votes are less carefully counted.

3 Some thoughts on the packet network architecture

 Lixia Zhang

January 1988 **ACM SIGCOMM Computer Communication Review**, Volume 17 Issue 1-2

Publisher: ACM Press

Full text available:  [pdf\(723.53 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

Performance control in packet switching networks is one of the remaining areas that are yet to be explored. In this paper we look into the performance problems with two existing network architectures, datagram and virtual circuit. The major problem with the datagram network is lack of effective traffic control; and with the virtual circuit network, the improperly defined network control semantics and mechanisms. We consider that a new

network architecture should be investigated in order to provi ...
